SUMMARY

Motivated B.Tech AI & ML student with strong skills in Python, Machine Learning, Data Analytics and Data Structures & Algorithms. Experienced in developing AI-powered applications, automation workflows, and full-stack web solutions. Eager to apply analytical and problem-solving skills to real-world challenges in Machine Learning and Software Development.

EDUCATION

CMR College of Engineering & Technology, Telangana

B.Tech in AI & ML (8.32 CGPA)

Aug. 2024 – Present

Impulse Junior College, Hyderabad

MPC (96.8%)

May. 2022 – May. 2024

PROJECTS

AI NANNY - A System That Analyze BabyCry | Python, Machine Learning

- Developed a full-stack web platform to help parents to know the reason why their baby crying using ML Models.
- Integrated AI-powered chat and voice agents to play lullabies.

IOT based Prototype that Eliminates Anti Air borne microbes in Air | C for Aurdino

- Detects Cough using Audio Sensor and Sprays Infection killing Medicine into air.
- Completely Automated System that Continuously monitor patients.

A System That Detect Malicious Users On X (Twitter) | Python, Deep Learning.

- A System that trained and tested using multiple machine Learning And Deep Learning Algorithms.
- Predict the result with various aspects like no.of followers, frequency of posts, rate of posting, etc.

TECHNICAL SKILLS

Programming: Python, Java

Database: MySQL

AI/ML: Pandas, NumPy, Scikit-Learn, Matplotlib, Machine Learning

Tools: Git, GitHub, VS Code, PowerBI, Tableau, Excel

Concepts: DSA, OOP, Problem Solving, DBMS, Operating System

ACHIEVEMENTS & ACTIVITIES

- Selected among Top 20 teams in a Hackathon for presenting an AI-based Baby Cry Analysis System.
- Built automation and AI-based mini projects using Model Context Protocols(MCP) and LLMs.
- Solved 100+ DSA problems on Leet Code and Code Chef.
- Leet Code 50 Days Badge and 100 Day Badge in 2026 for my consistency in Problem Solving.
